Bee United in Scandinavia!

COPENHAGEN

WORLD BEEKEEPING AWARDS

All details about World Beekeeping Awards (WBA) 2025 announced on the congress web page. List of classes, requirements, rules and all application details can be seen [here](#)

We will celebrate honey in many ways at the Congress like Global Honey Bar, Regional Honey Map, Global Honey Talks & Workshops but honey will no longer be a category and thus no honey judging, in the World Beekeeping Awards (WBA).

This change, to remove honey as a category in the WBA, was necessitated by the inability to have honey fully tested for adulteration and make awards at the Congress. The lessons learned from Canada 2019 and Chile 2023 were that adequate testing was impossible if we are to award winning honey at the Congress.

TECHNICAL EXCURSIONS

The Scandinavian countries are closely connected. From Copenhagen, you can reach Sweden in just 15 minutes via the bridge. Scandinavia offers a wealth of exciting destinations, which you can explore through the congress's organized tours.

We ensure that you will have the opportunity to experience Scandinavian beekeeping up close and meet local beekeepers to engage with. If you are more interested in sightseeing, there are plenty of tourist and cultural attractions to enjoy as well.

Technical Excursions are announced on the congress web page and registration is available. Please [click here](#) to see the tour alternatives and the their detailed programs.
