

SEPTEMBER 25th, 2025 – Thursday

AUDITORIUM-15

14:30 – 16:30

SYMPOSIUM / APITHERAPY

Biological Effects of Bee Products

Moderators: Mirela Valentina Strant and Thomas M. Gloger

14:30 – 14:45

Antibacterial activity of honey in wound and oral environments: the latest {in vitro} findings

Juraj Majtan – Slovakia

14:45 – 15:00

Anti-inflammatory activity of polyphenol-rich compounds from poplar-type propolis using an optimized extraction method

Meifei Zhu – China

15:00 – 15:15

Phenolic Compounds in Propolis Collected from an African and an Asian Region and Their Impact on Antioxidant and Antibacterial Activities

Soumaya Touzani – Morocco

15:15 – 15:30

The Effect Of Royal Jelly On Female Reproductive Health In Rats

Meral Kekeçoğlu – Türkiye

15:30 – 15:45

Assessment In-vivo effect of the binary mixture of Moroccan propolis and Olea europaea leaf extracts on type 2 diabetes induced by fructose and streptozotocin in rats: formulation by design of experiments (DOE)

Lyoussi Badiaa – Morocco

15:45 – 16:00

Practical use of propolis in veterinary medicine

Subject to Change

16:00 – 16:15

The local and systemic immune response after uterine infusion of propomiel in dairy cows

Rejean Cleophas Lefebvre – Canada

16:15 – 16:30

Supercritical CO₂ extracts of propolis inhibits tumor proliferation and Enhances the immunomodulatory activity via activating the TLR4-MAPK/ NF-κB signaling pathway

Yu Zhang – China
